

## XF Insert Fittings & Insertion Tool

### Features

- Complete line of 17mm insert fittings to simplify installation of XF Series Dripline
- High quality barbs grab tubing for a secure fit
- Unique barb design to reduce insertion force and still retain a secure fit
- Proprietary Insertion Tool significantly reduces the effort required to insert XF Insert Fittings into the tubing
- Brown color to match XF Dripline
- Compatible with XF Series dripline and most polyethylene tubing with 17mm OD
- Made of sturdy, break-resistant plastic

### Operating Range

- Pressure: 0 to 50 psi (0,0 to 4,14 bar)

|                                                                                     | MODEL              | DESCRIPTION                                                                          | APPLICATION                                                                                                                                       |
|-------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <b>XFF-COUP</b>    | Barb coupling 17 x 17mm                                                              | For 2-way joints                                                                                                                                  |
