ACCESSORIES

CERAMIN Tiles are wall and floor tiles designed for easy renovation and refurbishment. At just 3 mm thick and with their low weight, they are easy to work with and can be bonded directly to suitable existing substrates.

Four sizes and 22 decors provide plenty of scope for a wide range of applications – from walls and floors to bathrooms and kitchens.

FEEL GOOD FLOORS

As a leading German manufacturer of wall and floor coverings, CLASSEN stands for technological leadership and durable product solutions.

Around 2,000 employees worldwide work across the entire value chain to ensure efficient processes, responsible use of materials and continuous improvement.

Their expertise and commitment help promote resource-efficient processes, durable product concepts and the return of suitable materials into the recycling loop.

CLASSEN deliberately avoids the use of chlorine, PVC and plasticisers in its wall and floor coverings. With numerous patents made available to the entire industry, the company underlines both its independence and its ongoing commitment to innovation. With CERAMIN, CLASSEN has developed a material made largely from recycled plastic that also offers excellent recyclability. In doing so, CLASSEN makes an exemplary contribution to the circular economy.

Founded in 1962 by Dr Hans-Jürgen Hannig, the family-owned company is currently managed operationally by three generations, including the founder himself.

MADE OF **CERAMIN®**

www.blauer-engel.de/uz120

EPD
THE INTERNATIONAL EPD® SYSTEM

CERAMIN Tiles is based on CERAMIN – an innovative high-performance material developed and manufactured exclusively by CLASSEN.

CERAMIN was developed with the future in mind and provides the basis for PVC-free wall and floor coverings. As a market-ready alternative “Made in Germany”, the material also offers excellent recyclability.

CERAMIN consists mainly of a natural mineral filler and polypropylene (PP), which in turn is largely made from recycled materials.

The raw materials are sourced predominantly from Europe and processed in Germany, helping to keep transport distances short and ensure a reliable supply of CERAMIN.

**COVER.
DON'T
REMOVE.**

QUICK TO CUT TO SIZE

Cut quickly and accurately to the required size using a utility knife or jigsaw.

NO NEED TO REMOVE EXISTING TILES

Install directly over existing tiles and significantly reduce renovation time.

INTEGRATED JOINT

The micro-joint on sizes S, M and L creates a consistent joint pattern, with no additional grouting required.

APPLY ADHESIVE

Spread the adhesive evenly over the prepared substrate using the appropriate notched trowel.

ACCURATE FIT

The tongue-and-groove system ensures quick, clean and accurate installation.

PRECISE CUT-OUTS

Create precise cut-outs and openings for pipes without the risk of breakage.

EASY TO INSTALL

TONGUE AND GROOVE

Format **60 × 30**

Format **80 × 40**

Format **120 × 40**

No grouting required.

XL FORMAT WITH **GROUTED JOINTS**

SQUARE EDGE

Format **255 × 120**

Tiles are bonded side by side and the joints are then finished with natural-stone silicone sealant or epoxy resin grout.

THE RIGHT SIZE FOR EVERY JOB

With four sizes, CERAMIN Tiles offer the right solution for a wide range of renovation and refurbishment projects. Sizes S, M and L can be combined flexibly to create a wide range of laying patterns. The XL format is ideal for particularly large, almost seamless surfaces.

L 120 × 40

1180 × 392 × 3 mm

S 60 × 30

642 × 315 × 3 mm

XL 255 × 120

2550 × 1202 × 3 mm

M 80 × 40

780 × 392 × 3 mm

LARGE SURFACE. LOW WEIGHT.

255 × 120 cm in size and weighing just 15 kg:
CERAMIN Tiles XL combine the look of a large-format
tile with easy handling.
This makes transport and installation easier on site.

At the same time, large surfaces can be created with
fewer joints for a clean, uniform finish.

FROM OLD TO NEW

When refurbishing a bathroom, removing and disposing of old tiles takes time, labour and money. With CERAMIN Tiles, much of this work can often be avoided: the existing tiles stay in place and provide the substrate for the new surface.

In wet areas, the substrate is first waterproofed correctly before the tiles are bonded directly on top.

The low build-up height makes refurbishment of existing interiors easier, with less removal work, mess and waste to dispose of.

ROOM FOR NEW IDEAS

CERAMIN Tiles offer plenty of flexibility for individual renovation and refurbishment projects.

Different sizes and decors offer a wide range of design options – from subtle accents to large surfaces. One system can therefore meet a wide variety of requirements and room designs.

Decorative wall finishes

THE BENEFITS

COVER EXISTING TILES

Bond directly over existing tiles or plasterboard.

LIGHTWEIGHT AND EASY TO HANDLE

Significantly lighter than conventional ceramic tiles.
For easier handling during transport and installation.

MINIMAL BUILD-UP HEIGHT

Just 3 mm thick.
Ideal for renovation work.

EASY TO CUT

Cut to size with a utility knife or jigsaw, and drill holes easily
with a cordless drill.

100 % WATERPROOF

Ideal for wet areas such as bathrooms, showers
and other damp areas.

RANGE OF SIZES

Four different sizes that can be combined flexibly.

EASY DISPOSAL OF OFFCUTS

For domestic use, offcuts can be disposed of in accordance with local waste disposal regulations. For commercial construction waste, offcuts can be classified under European Waste Catalogue code 17 02 03. Always observe the applicable national and local waste disposal regulations.

DESIGNED FOR DEMANDING APPLICATIONS

CERAMIN Tiles are designed for heavily used areas and meet Usage Class 34 in accordance with EN 10874. This performance is based on the robust CLASSEN CERAMIN® core board, which makes the flooring particularly hard-wearing and durable.

ACCES- SORIES

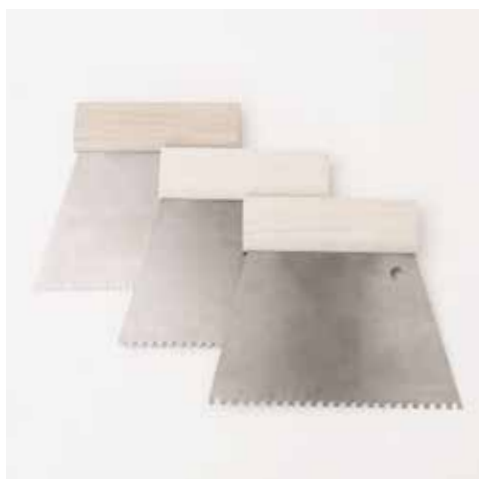

ADHESIVE

SMP adhesive for secure installation of CERAMIN Tiles. Scan the QR code for further recommended adhesives.

ONE COMPLETE SOLUTION

The CLASSEN Shower Tray completes the coordinated bathroom concept, allowing walls, floors and the shower area to be matched seamlessly.

The precisely matched system combines a premium finish with quick, clean installation, making it ideal for refurbishment projects. The result is a consistent overall look without compromising on design or performance.

LIGHTWEIGHT

Significantly lighter than conventional shower trays. For easier handling during transport and installation.

EASY TO CLEAN

Low-maintenance thanks to the smooth surface.

LOW BUILD-UP HEIGHT

For easier and more comfortable access.

FLEXIBLE INSTALLATION OPTIONS

Install on feet, on screed or flush with the floor – suitable for standard 90 mm shower drains.

SLIP-RESISTANT

Classification: R10 B.
